# About Us

## About SNOW

Over the years, SNOW has gained recognition to be an approved brand for HDB Building projects. SNOW provides products for both residential and commercial building markets, in new build and renovation segments, as well as a wide range of solutions for public utility applications.

In 2020, SNOW became part of the China Lesso Group (Stock Name: China Lesso, Stock Code: 02128.HK), a large industrial group of home furnishings and building materials in China. China Lesso offers products, services and channels involving piping, building materials and home furnishings, environmental protection, and modern agriculture.

With the rapid development of internationalization and globalization, China Lesso boasts more than 80 holding subsidiaries and more than 23 production bases distributed in 17 provinces across China, and in Canada and Indonesia. China Lesso remains committed to improving its strategic layout, broadening its sales network and expanding the market. This is how it provides products and services for customers in a timely and efficient way.

When you choose SNOW, you can be confident that all your piping materials are designed, built and backed by one company, one supplier to stand behind you and your complete system.

## QUALITY & CERTIFICATION

## SYSTEM CERTIFICATION

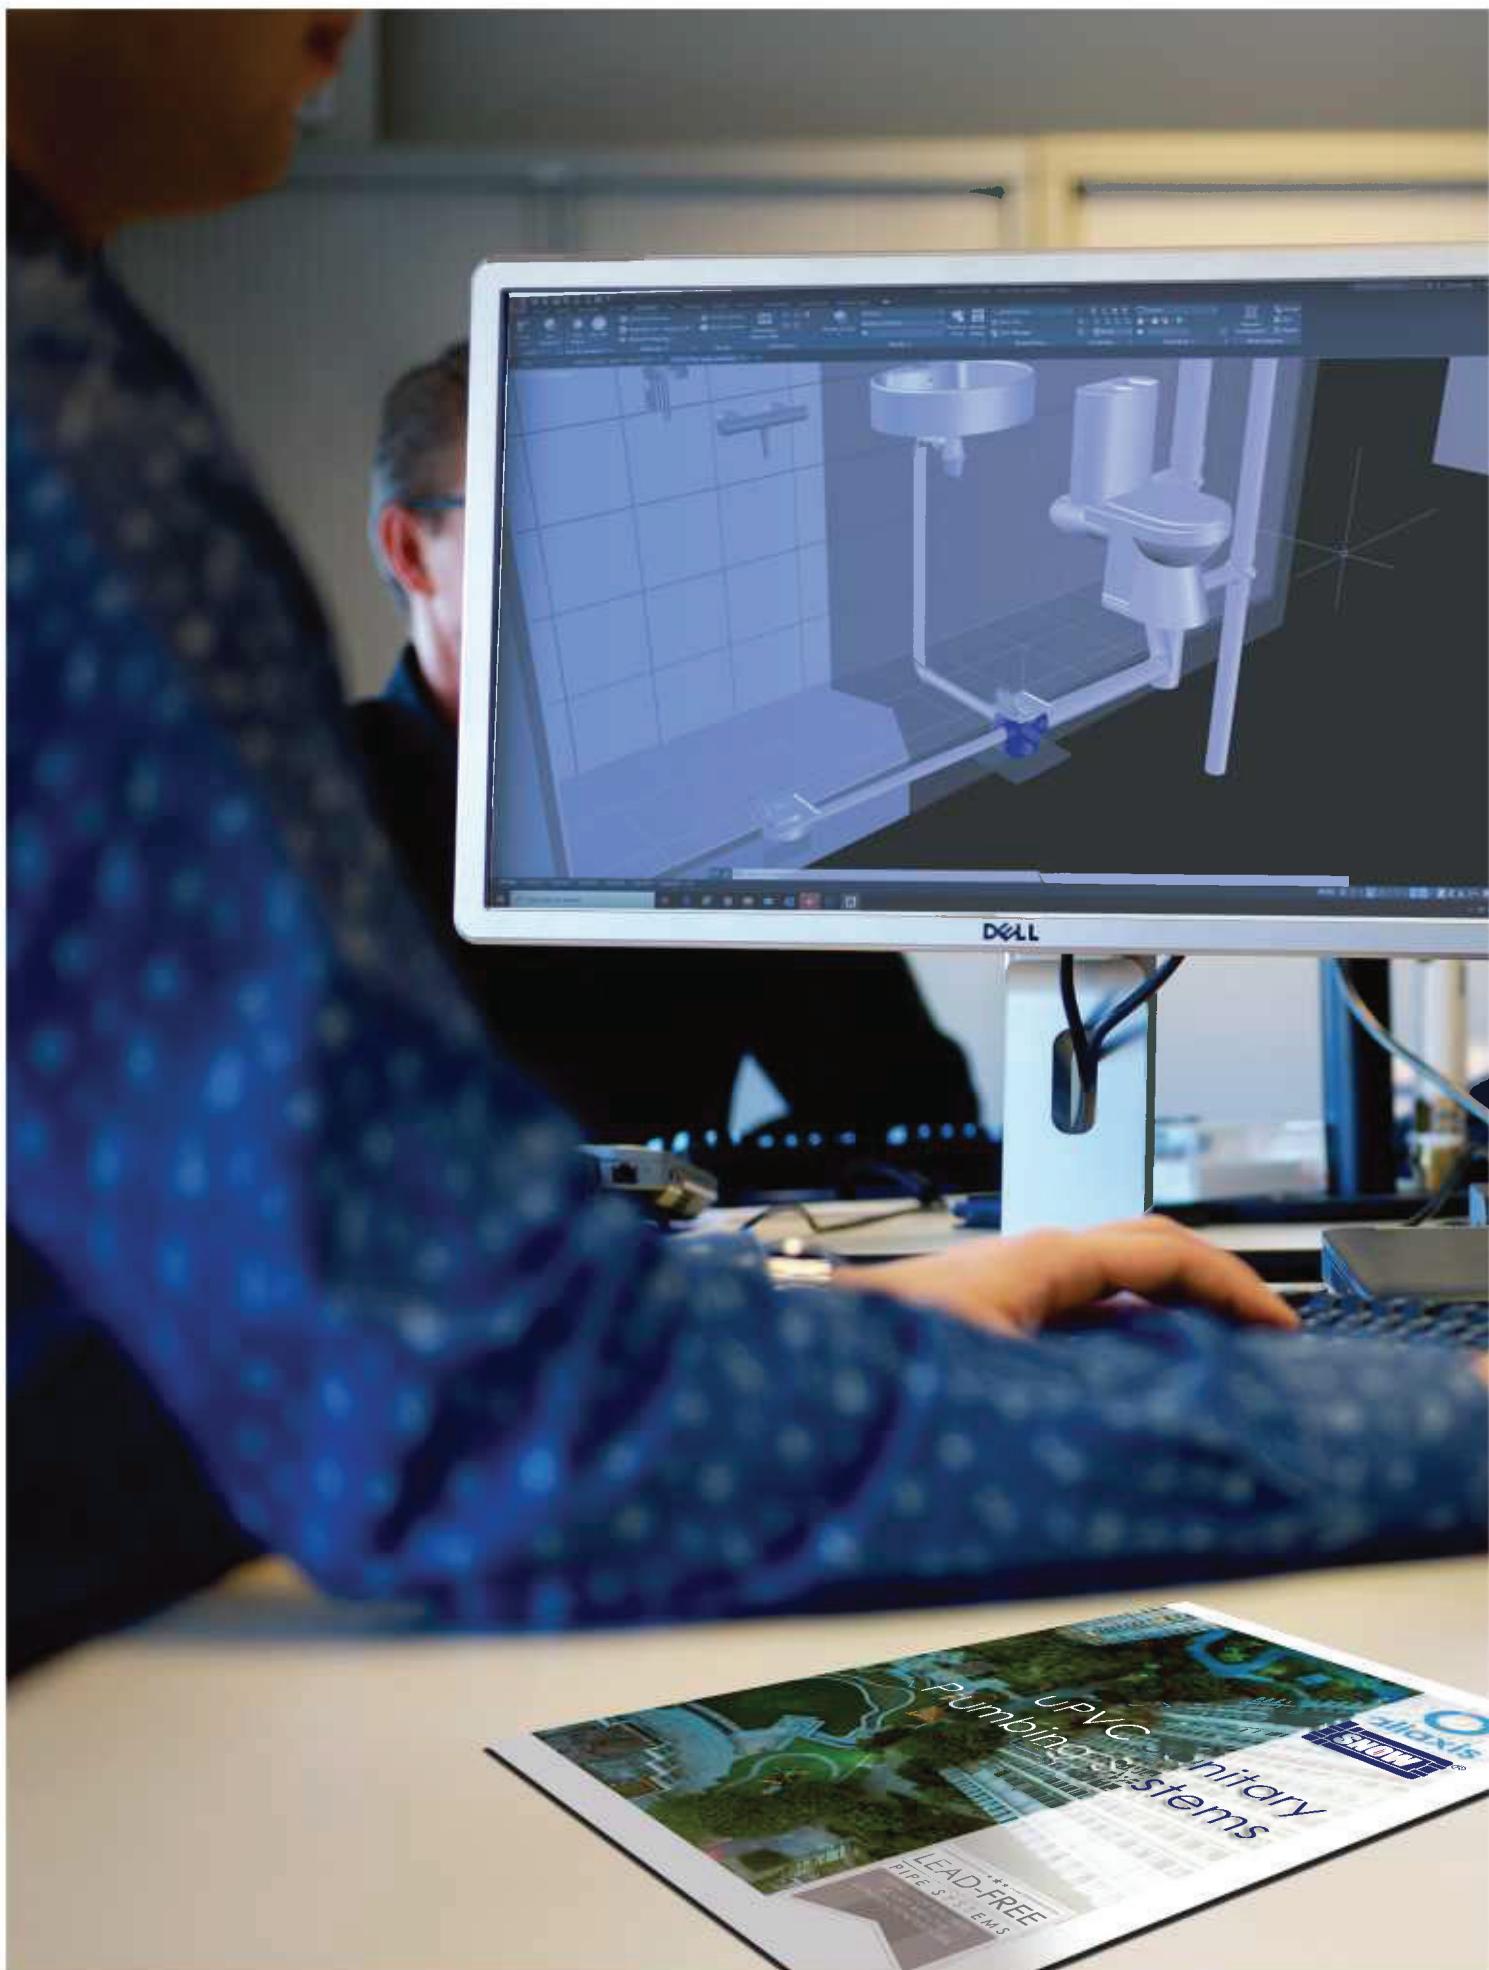

### FITTINGS

1. Un-Plasticised Polyvinyl Chloride (uPVC) fittings for soil and waste discharge (low and high temperature) within the building structure.
2. Un-Plasticised Polyvinyl Chloride (uPVC) fittings for non-pressure underground drainage and sewerage.

### PIPES

1. Un-Plasticised Polyvinyl Chloride (uPVC) pipes for soil and waste discharge (low and high temperature) within the building structure.

# SNOW Material Characteristics

**SNOW** – Soil, waste & Vent Drainage System is manufactured in accordance to the requirements of Singapore Standards, SS213:1998. Un-Plasticised PVC Pipes & Fittings for soil, waste & vent applications (Equivalent to British Standard BS4514, BS5255, & Australian / New Zealand Standard AS/NZS1260).

## Lightness

uPVC is approximately half the weight of copper pipe, one-fifth of the weight of steel pipe and one-tenth the weight of cast iron Pipe. Transport and handling is therefore both simple and convenient.

## Chemical Resistance

The excellent chemical resistance of uPVC to acids, alkalis, oxidising and reducing agents makes it particularly suitable for a wide range of industrial applications. Generally uPVC is resistant to most oils, fats, alcohols and aromatic-free petrol, but is unsuitable for use with aromatic and chlorinated hydrocarbons, ketones, esters and cyclic ethers which lead to marked swelling and softening of the material.

## High Flow Rate

The internal surface of uPVC pipes & fittings is "extremely smooth" equivalent to a Manning and Kutter coefficient of 0.010, giving excellent flow properties which remain constant due to reduced build-up of scale.

## Flammability

uPVC does not support combustion. uPVC is a flame retardant material commonly used in fire risk areas. uPVC frames are a self extinguishable material that does not support combustion.

1. UPVC compared to other plastic products is self-extinguishing. So if the source of the fire is taken away it would stop burning.

## Weather Resistance

The SNOW range is manufactured from a specially formulated uPVC compound, developed from many years of trial, resulting in a tough resilient material with excellent outdoor weathering performance.

## Low Installation Cost

Tight dependable connections are made by solvent cement welding of uPVC pipe & fittings. The combined with the other advantages of lightness, flexibility and the use of pre-fabrication techniques, can afford savings both in time and money. As it is the case with all materials, certain of their characteristics need to be considered during installation. Similarly, before installing uPVC it is necessary to take into account the following properties.

## Effect of Low Temperature

The impact strength of uPVC pipe and fittings decreases with reduction in temperature therefore increased care should be exercised if installations are carried out near 0°C.

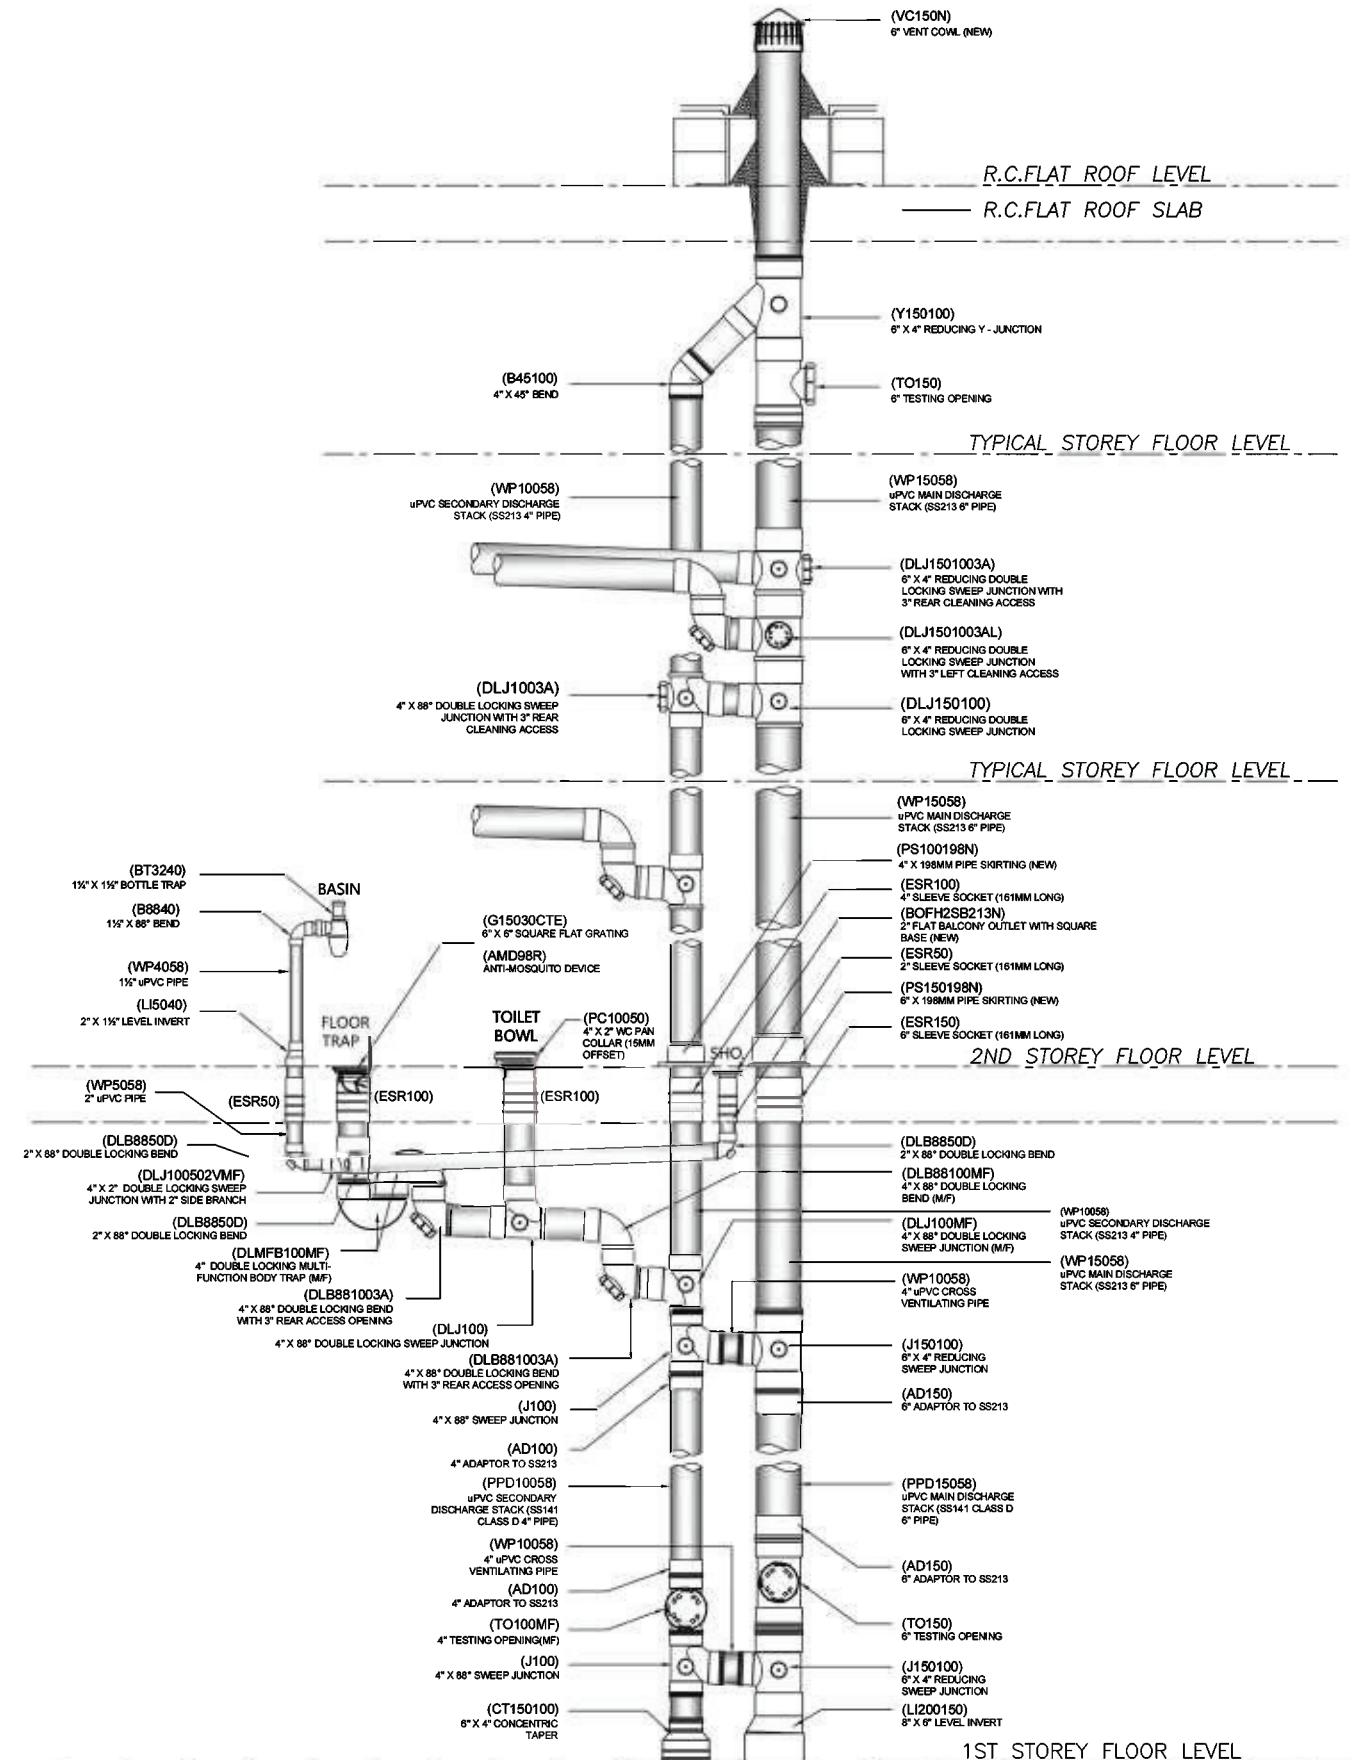

## Effect of Elevated Temperature

The uPVC remains stable under load to a temperature of approximately 75°C and is therefore satisfactory for use in soil or waste systems where continuous full bore discharges of effluent are unlikely to exceed this figure. The low thermal conductivity of the material does allow full bore discharges at higher temperatures provided the duration of discharge is limited to 2-3 minutes.

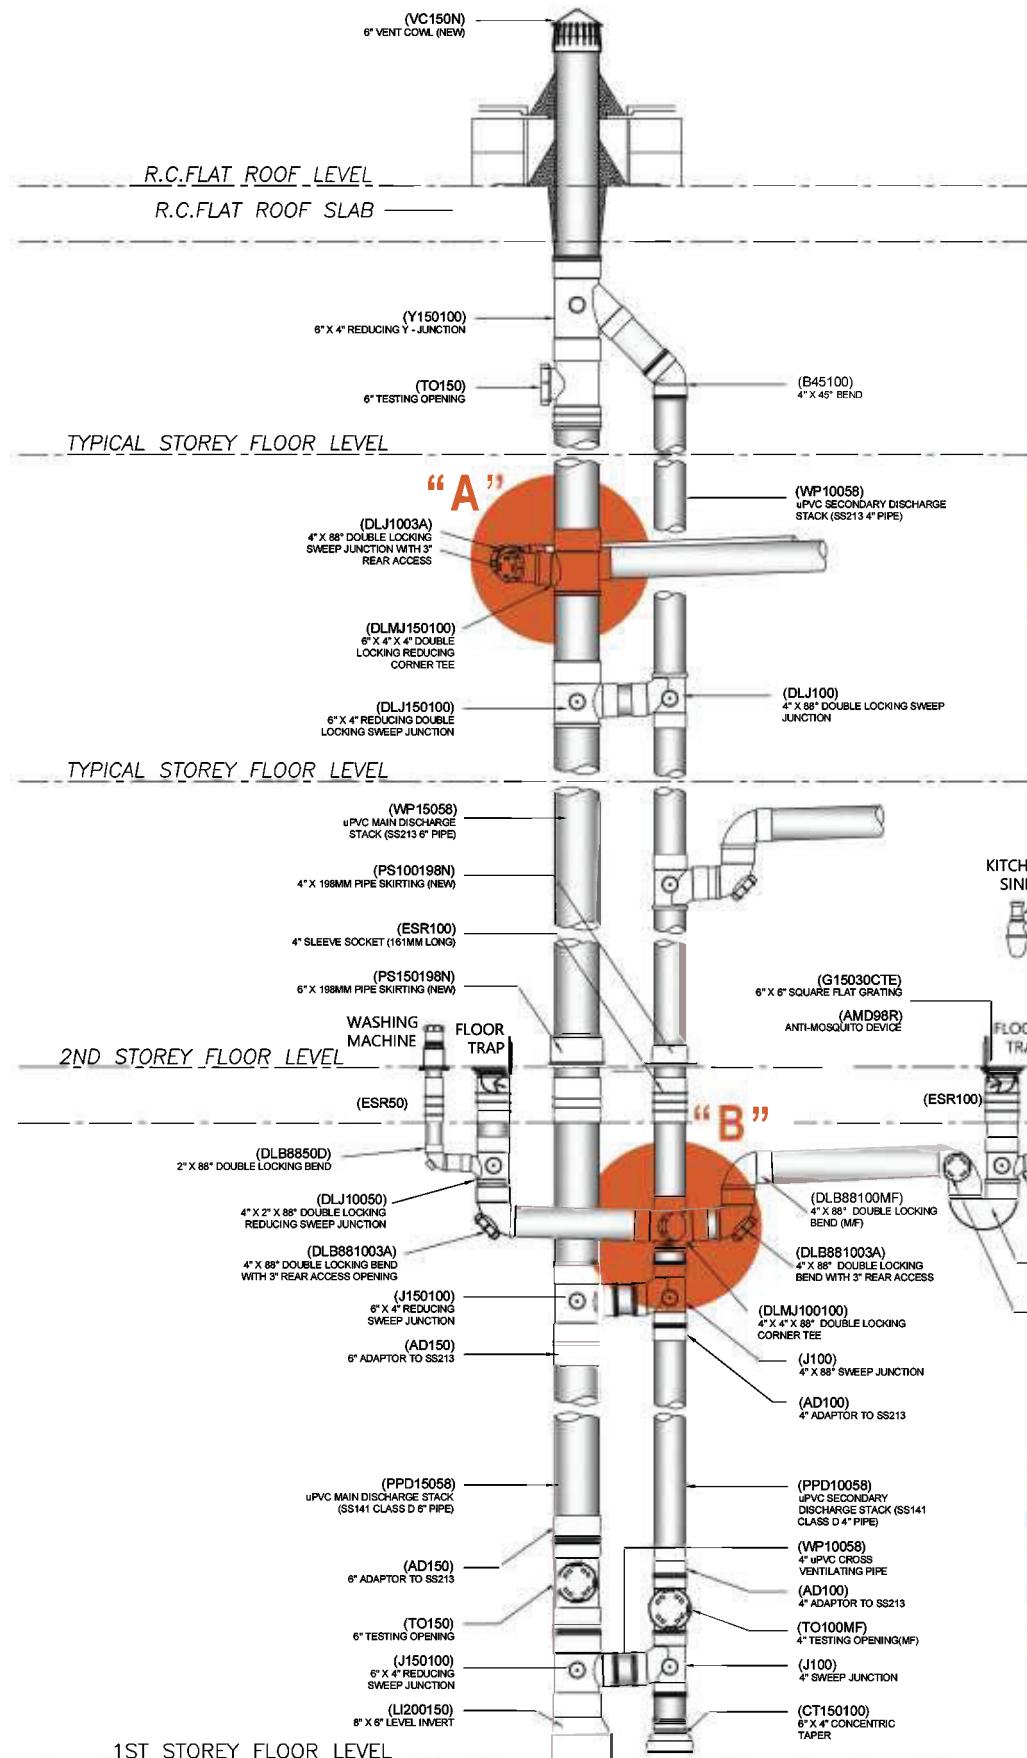

## Specialized Applications

The systems are more than adequate for normal domestic applications in low and multi-rise dwellings. Where more specialized applications, such as tea-makers, autoclaves, hospitals, industrial kitchens and laboratories are concerned, where prolonged discharges of liquids at elevated temperatures can occur.

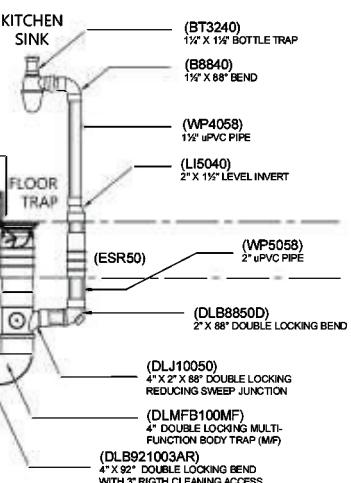

## UPVC SANITARY PLUMBING SYSTEM // BATHROOM TYPICAL LAYOUT

## KITCHEN TYPICAL LAYOUT for HDB

## PRODUCT RANGE

# SOIL, WASTE, VENT SYSTEM

## FEATURES

- Designed & developed in Singapore
- High performing PVC-U system - meets temperature, pressure and size requirements for above ground drainage.
- High quality finish with smooth internal and external surfaces
- Excellent resistance to chemicals found in domestic effluent
- Complies with SS213: 1998 Equivalent to BS5255, BS4514 and AS/NZS 1260
- Backed by Lesso group, a global leader in plastic handling systems

## ADVANTAGES

- Complete system of pipes and fittings for Soil, Waste & Vent
- Proven track record at more than 40 years of delivering quality products
- Low installation cost and easy handling helps to reduce project cost
- Long term durability and performance minimizes cost of repairs
- Lead free formulation improved environment friendly
- System resistance to bacteria and fungi
- High flow capacity due to high quality finish

## APPLICATION

- Snow's Soil, Waste & Vent Systems are used in all types of construction
  - HDB and private residential projects
  - Commercial projects such as hotels, shopping malls and offices
  - Industrial buildings and factories

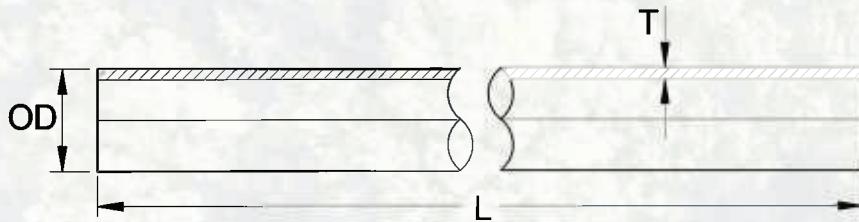

## SNOW Soil, Waste & Vent uPVC Pipes

**STANDARD** : SS213:1998 Equivalent to BS5255, BS4514, AS1415 & AS/NZS1260

**COLOUR** : White

**MATERIAL** : PolyVinyl Chloride (PVC)

PRODUCT CODE	NOMINAL MM(INCH)	MEAN- OD (MM)	THICKNESS - T MM(MIN)	LENGTH - L M

## PRODUCT RANGE

# SNOW UPVC PIPES

### FEATURES

- High quality finish smooth internal and external surfaces
- Provides low coefficient of flow friction
- Excellent resistance to chemical found in domestic effluent
- Size range - Pipes & Fittings
- Remains stable under elevated temperature

### ADVANTAGES

- Premium Formulation and Reliability
- High Drainage Performance
- Very Competitive
- Algae Resistance
- Easy to install, transport and handle
- Low maintenance cost
- Lead free formulation improves environmental friendliness

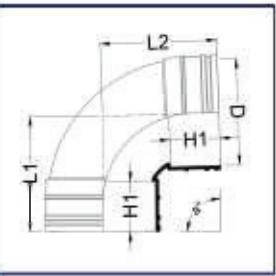

### APPLICATION

SNOW SWV uPVC Pipes are more commonly used in HDB projects, Private Condominium, Industrial and Commercial Buildings. And they are suitable to used also in Rainwater and other water discharge purposes above ground.

## BALCONY OUTLET ASSEMBLY

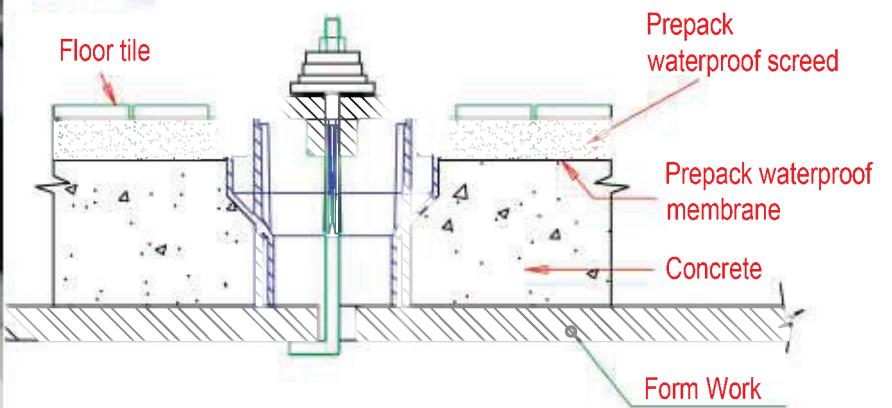

### Advantages:

1. Prevent leakage
2. Effective for pre-casting
3. Easy to install
4. Save workmanship

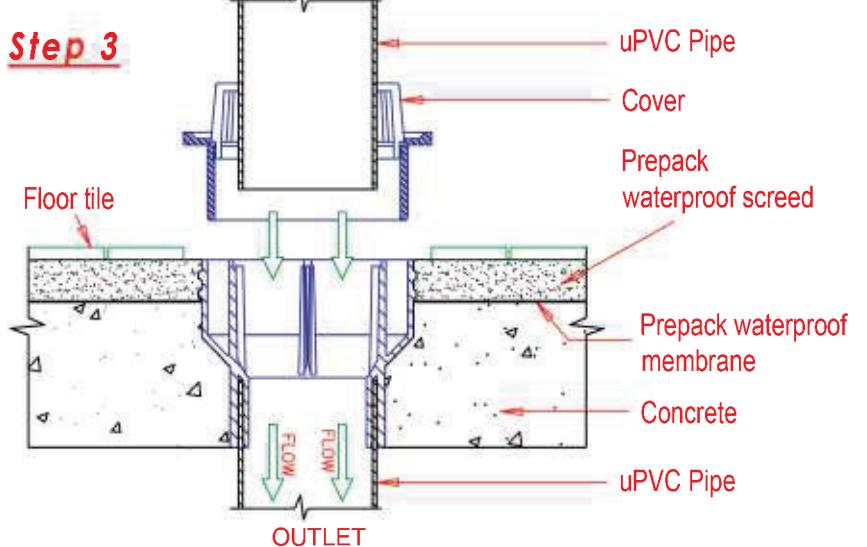

### Step 1

### Step 2

### Step 3

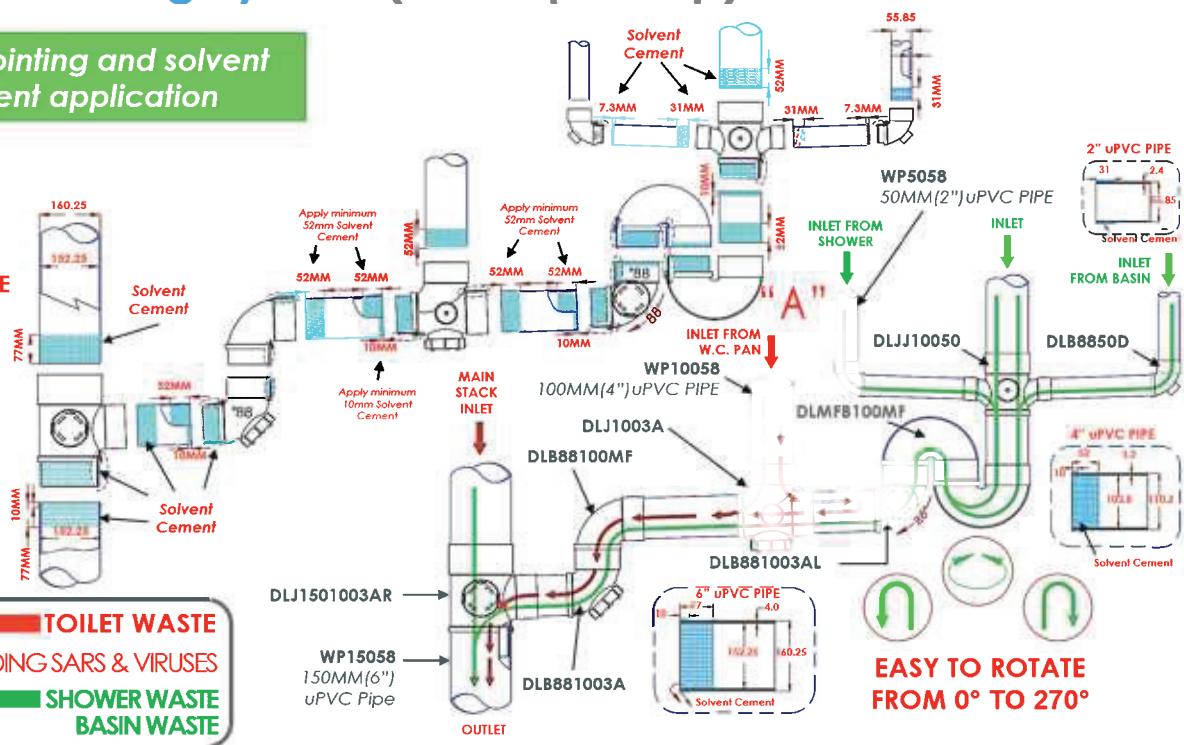

## Double Locking System (S – Trap Setup)

**Proper jointing and solvent cement application**

**ANTI-LEAKAGE**

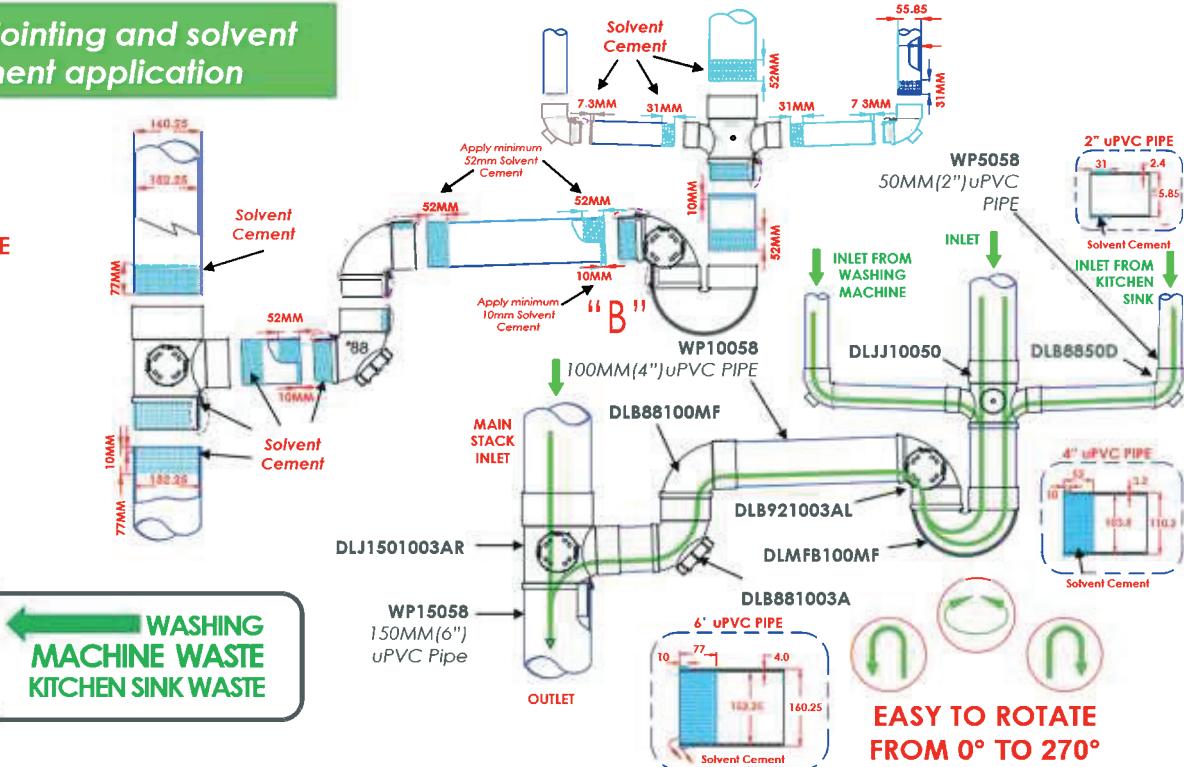

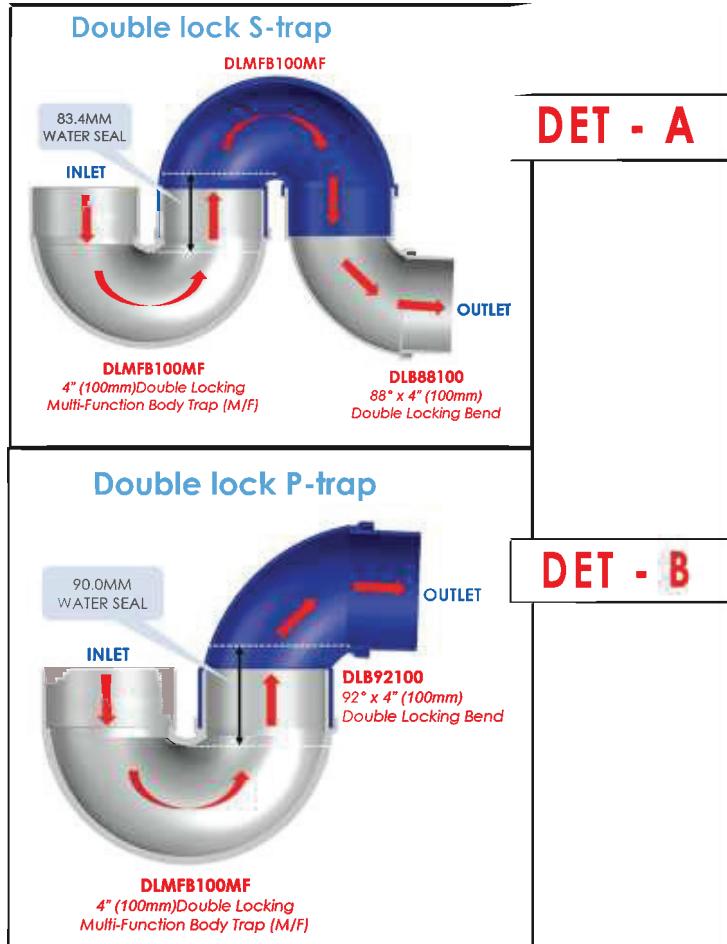

## Double Locking System (P – Trap Setup)

**Proper jointing and solvent cement application**

**ANTI-LEAKAGE**

## PRODUCT RANGE

# DOUBLE LOCKING SYSTEM

### FEATURES

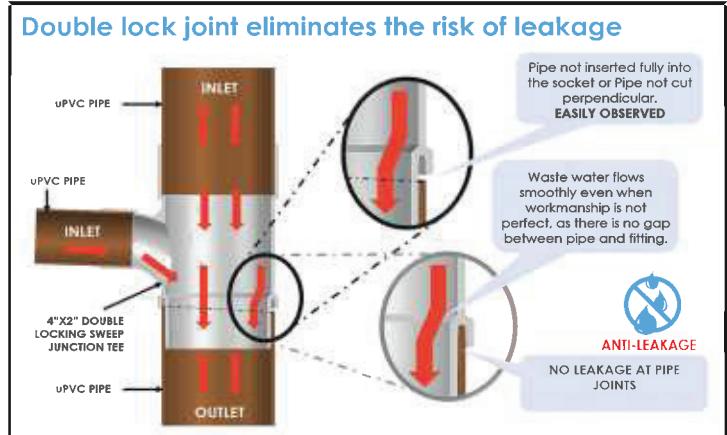

- System designed and developed in Singapore
- Approved for use in all Singapore HDB projects
- Superior designed prevent leakage and ensures poor workmanship is easily identified
- The waste water will flow smoothly through the pipes
- High performance PVC-U system – meets temperature, pressure and size requirements for above ground drainage application.

### ADVANTAGES

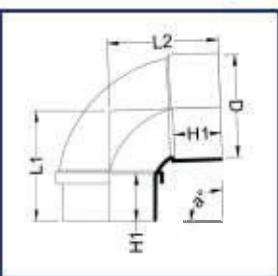

- Superior design prevent leakage and ensures easy detection of flows, even if:
  - Pipe is not fully inserted into the socket end
  - Pipe is unevenly cut
  - Solvent cement insufficient or incorrectly applied
- Leakage prevention and easy to install
- Ensures lower installation and maintenance cost

### APPLICATION

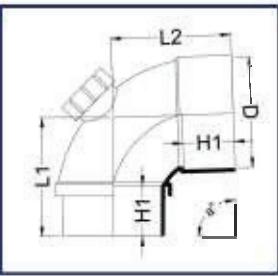

- Snow Double Locking system is mandatory for all HDB Housing Projects
- Snow's Double Locking System offers leak proof drainage in all types of construction.

## 88° DOUBLE LOCKING BEND (F/F)(M/F)

SC500GM70W	(Solvent Cement SSS NO70 (JAPAN)	500 ML	10
AEP500GM	500ML Epoxy Putty	500 G	24

## PRODUCT RANGE SOLVENT CEMENT

CODE NO.	DESCRIPTION	GMS	TIN/CARTON
SC500MLW	Faltek Solvent Cement (Clear)	500	20
SC500MLB	Faltek Solvent Cement (Blue)	500	20

### FEATURES

- **Trouble-free product** for oil plastic pipe installation.
- **Moderate solvent odour** which creates a safe working environment for all.
- **Unique design** to prevent leakage or solvent loss during shelf life.
- **Complies with MS628 & BS4346 standards** for solvent cement used for plastic installation.
- **Deliver dependable performance** and reduce loss time due to leakage caused by poor solvent cements.

### FALTEX SOLVENT CEMENT (CLEAR)

**Solid Content:** 16-18%

**Consistency Property:** 1,000 cps

**Quality:** Tough & Resilient

**Colour:** Clear

**Standard:** MS628 Part II Section 2.2:1999

- Highly soluble PVC-U Solvent Cement.
- Suitable for joining all PVC-U pipes from 15mm - 450mm diameter.
- When applied, it will instantly dissolve and blend with the pipe to produce a film (wall) of 0.4mm thick, so that the fittings gap will be strong and stable.

### ADVANTAGES

- **High quality performance** with excellent installation properties.
- **Available in Clear/Blue** for easier inspection and professional finishes.
- **Tested by Singapore Testing Lab Pte Ltd (STL)** and approve all HDB projects application.
- **Expert R&D** to develop the most technically advanced and innovative product to meet our customers' needs.

### FALTEX SOLVENT CEMENT (BLUE)

**Solid Content:** 16-18%

**Consistency Property:** 1,000 cps

**Quality:** Tough & Resilient

**Colour:** Blue

**Standard:** MS628 Part II Section 2.2:1999

- Approved for HDB usage.
- Suitable for joining all PVC-U pipes from 15mm - 450mm diameter.
- When applied, it will instantly dissolve and blend with the pipe to produce a film (wall) of 0.4mm thick, so that the fittings gap will be strong and stable.

## SOLVENT CEMENT REQUIREMENT FOR PVC-U PIPES & FITTINGS

NOMINAL SIZE OF PIPES OR FITTING (mm)	AMOUNT OF SOLVENT CEMENT REQUIRED PER JOINT (g)	NO. OF POSSIBLE JOINTS	
		100 g	500 g
15	1.3	76	383
20	2.0	55	250
25	2.5	40	200
32	3.2	30	156
40	5.0	20	100
50	7.2	13	69
80	12.0	8	41
100	15.5	6	32
155	26.0	2	19
200	49.0	1	10

## PHYSICAL AND MECHANICAL PROPERTIES

### Flammable Mixture (UN No. 1133)

This solvent cement material will ignite at ambient temperatures. Colourless vapours may travel considerable distance to ignition sources and cause flash or explosions.

### Hazard Identification

May cause eyes and skin irritation, burns or dermatitis.

### Storage

Store in well-ventilated area. Keep away from heat, sparks and flame.

### Safety Advice

- Keep out of reach of children.
- Keep away from sources of ignition.
- No Smoking.
- Avoid contact with eyes.
- In case of fire, use chemical powder, foam or carbon dioxide.

## ATTENTION:

1. Temperature below 15°C (50°F) will extend the straining period for approximately 5 minutes for each type of pipes.
2. All the above solvent cement is not applicable to those PVC-U pipe or fitting which are made of partly recycled material.
3. After assembly, the pipe must be tightly held in place and shall only be released after reasonable straining time as stipulated. If release prematurely, the pipe to be fitted will spring apart.

### PACKING

500 g (with brush) X 20 Tins per ctn.

### CTN. SIZE

513mm X 238mm X 210mm

## ASSEMBLY PIPES WITH SOLVENT CEMENT JOINTS

-1-

### CUT & DEBURR

Where necessary, cut pipe to length at right angle to its axis to maximize surface for bonding. Use of a mitre box and fine tooth saw is recommended.

Cut surface need to be deburred and chamfered to a slight bevel to simplify centred insertion and uniform adhesive distribution between parts.

-2-

### DEGREASE THE SPIGOT AND SOCKET

Mark the insertion depth to the pipe spigot to avoid excessive application and provides control as to whether pipe has been adequately inserted into the fitting.

Clean parts to be fused with priming fluid to ensure that dirt and possible slip and release agents are removed for optimal results. Scrape off any discoloured pipe layer due to UV-radiation or proper bonding cannot be achieved.

-3-

### APPLY THE SOLVENT CEMENT

can or tin well before using to ensure homogeneity.

Apply adhesive evenly to both sides to be mated using a brushing stroke parallel to or along the pipe axis. Joint must be made within 1 minute of starting application.

-4-

### MAKE THE JOINT

Insert pipe straight into the fitting as deeply into the fitting socket as possible without twisting and hold in place firmly and steadily for at least ten seconds.

-5-

### CLEAN THE EXCESS SOLVENT CEMENT

Remove excess solvent cement with a soft cloth. A small closed adhesive ring should be clearly visible at the end of the fitting to signal that the sufficient adhesive has been applied.

Wait 24 hours before testing or use
